Measurement Files' Validation Email

Data Validation Results:

An automated validation email will be sent to your organization's data team indicating whether your file passed or failed validation.

Note: During our data analysis we may find inconsistencies with your measurement data logic. **Jose Ordonez** will reach out if any corrections are necessary.

What will you find in your validation email:

Errors: An error will make your file fail validation.

Warning: A warning will make your file pass validation, but you should review your file and confirm that you have reported on everything that was agreed with CalHIVE BHI's data team.

California Quality Collaborative

Cycle 5 Global Reporting Goals

By Cycle 5, each provider organization will have:

1. Reduced the number of global measurement file submissions to 2 (only 1 attempts to fail validation).
